

## Product data sheet – Slab grip with ratchet

### Product description

The slab grip with ratchet is an indispensable aid for tradesmen. Whether you're adjusting a roof framework or installing prefabricated timber construction components, the beam grip/slab grip allows you to pre-tension timber quickly and easily.

### Advantages

- Minimal processing marks due to fixing with wood construction screws
- Suitable for hard-to-reach locations (e.g. in angled areas such as roof slopes)
- Allows corner connectors to be drawn together
- Suitable for timber types with an increased risk of cracking and splintering

### Properties

- Boss plate can be rotated by 360°
- 8 fixing holes per boss plate
  - ⇒ 6 x Ø 9 mm,
  - ⇒ 2 x Ø 13 mm
- Maximum span width: 700 mm

### Article table

Art. no.	Span width	PU
954037	Up to 700 mm	1
